

# Using a Conda environment

Not super necessary, but a very nice approach to keeping things consistent and reproducible

# Some preliminary things

- Download the files for today:
  - Download the Hobbit, the chunked corpus and the csv of the dataframe from here:
    - <https://bit.ly/3MrYl4S>
  - You will also want three different notebooks (zipped up here):
    - <https://bit.ly/3BuSCFd>
    - The notebooks are: chunk\_hobbit.ipynb, hobbit\_bertopic\_visualizations.ipynb, and hobbit\_from\_saved-model.ipynb
- Create a directory, Hobbit\_test, in your home directory or wherever you'd like to work

From Terminal:

```
% cd ~  
% mkdir Hobbit_test  
% cd ~/Hobbit_test
```

- Move your downloaded zip files to Hobbit\_test and expand them
- You need to move your data into Hobbit\_test from the hobbit\_data subfolder

```
% mv hobbit_data/* ../Hobbit_test
```

# Conda environment

- Download and install mini conda:
  - <https://www.anaconda.com/download/>

# Create, populate and activate conda env

- Create conda virtual environment

1. In terminal:

```
% conda create -n Hobbit python=3.9
```

Click y to proceed when prompted

2. check if your environment is made

```
% conda env list
```

3. activate the environment

```
% conda activate Hobbit
```

4. Install some stuff

```
% conda install -n Hobbit -c conda-forge Bertopic
```

Enter y to proceed when prompted

```
% conda install -n Hobbit -c anaconda jupyter
```

Enter y to proceed when prompted

- Deactivate and then activate the Hobbit environment (not necessary but it solves the occasional problem of packages not being found)

```
% conda deactivate
```

```
% conda activate Hobbit
```

# Launch your notebook in your Hobbit directory with the Hobbit env active

- If you aren't in your Hobbit directory, pop into your Hobbit directory:

```
% cd ~/Hobbit_test
```

- launch jupyter notebook

```
% jupyter notebook
```

- You should now see your code and the files that you have in your Hobbit\_test directory listed in your notebook!

Select items to perform actions on them.
